

# SUPPORTING REGIONAL FOOD AND FIBER SYSTEMS

TO BENEFIT PEOPLE & THE PLANET

Food and fiber systems create and are impacted by similar challenges. Considering food and fiber as cooperative industries can help us consider holistic solutions for producers, consumers, and the planet.

## STRATEGIES

- 

Require greater transparency of environmental impacts from industry leaders.

- 

Provide information and resources to create smarter consumers and consumer behavior.

- 

Support local producers and create a greater emphasis on localized systems.

- 

Promote and investigate integrated food and fiber systems.

- 

Harness the power of carbon farming.

- 

Fund soil-based regional textile and food economies.

## LEARN MORE

Join us in developing regional fiber systems that build soil & protect the health of our biosphere at [fibershed.org](http://fibershed.org).
